EXPERIENCE

AI & Data Engineer
Feb 2025 - Apr 2026

IE Network Solutions | Addis Ababa

- Built AI-powered enterprise assistant integrating multiple REST APIs
- Implemented LLM-based intent routing (API, AI, Hybrid decision systems)
- Developed scalable backend services using FastAPI
- Deployed production-grade AI systems on Microsoft Azure
- Designed automation workflows to improve operational efficiency

Full Stack Developer
Jul 2023 – Feb 2025

Freelance

- Designed and developed end-to-end full stack applications using React, Next.js, Express.js, and NestJS
- Built scalable backend systems and RESTful APIs to support dynamic web platforms and data-driven applications
- Developed and deployed AI-powered features including NLP pipelines for document processing and automation
- Integrated third-party APIs and services for authentication, data exchange, and external system connectivity
- Implemented modern frontend architectures with responsive UI/UX and optimized performance
- Built and deployed applications using cloud platforms (Azure) with focus on scalability and reliability
- Applied clean architecture and modular design patterns for maintainable and production-ready systems

EDUCATION

BSc in Computer Science
2021 - 2024

University of Gondar

- Graduated with Honors.

CERTIFICATION

DP 100 - Azure Data Science
Microsoft

Data Scientist
Datacamp

SUMMARY

- AI Engineer and Full Stack Developer with hands-on experience building data-driven systems, machine learning models, and intelligent dashboards. Skilled in Python, JavaScript (React/Node.js), and cloud-based AI solutions. Experienced in developing end-to-end applications including APIs, data pipelines, and predictive models. Strong interest in applying AI, NLP, and analytics to real-world challenges such as humanitarian data systems, forecasting, and decision support tools.

SKILLS

- Azure, Deep Learning, GitHub, Python, PyTorch, SQL, TensorFlow, React, Node.js

KEY PROJECTS

Food Recipe Website
- Recipe Sharing & Meal Planning Platform
- Built a full stack recipe management web application using React / Next.js and Node.js (Express/NestJS)
- Implemented features for recipe creation, search, filtering, and categorization
- Designed user authentication system (login/signup, profile management)
- Integrated API for nutritional data and ingredient suggestions

AI Enterprise Assistant (Copilot System)
IE Networks Solution

- Built LLM-powered assistant for automation and decision support
- Integrated multiple APIs with intelligent routing
- Enabled task automation and business insights generation

OKR Recommendation System
IE Networks solutions

- Designed AI-driven planning and recommendation engine
- Built and deployed APIs on Azure for real-time recommendations
